Price per sq ft has a long right tail from Palm Jumeirah

Transactions by price-per-sq-ft bin · solid line = mean, dashed orange line = median

Large villas pull the mean sale price above the median

Mean vs median sale price by area (AED)

Key insights

1. **Dubai South (7.5%) and JVC (7.1%)** have the highest gross yields of ready units, compared with **4.2%** in Palm Jumeirah. The ANOVA confirms that areas differ on price ($F = 952$, $p < 0.001$).
2. Price per sq ft rose **14.0% (2024)** and **16.0% (2025)** when Jan–Sep is compared with Jan–Sep. The 2025 increase is significant ($t = 5.37$, $p < 0.001$).
3. Off-plan looks **7% cheaper** overall (AED 2,240 vs 2,406 per sq ft). Inside every one of the 9 areas, though, it is **4–14% more expensive**. The overall gap comes from the area mix.

Recommendation

For an **AED 1.5M** rental-income budget, buy a **ready apartment in JVC**. The average price is **AED 0.97M**, the yield is **7.3%**, and the rent is about **AED 71k a year**, from 45 comparable sales.

Dubai South yields slightly more (7.6%). However, it has fewer comparable sales (28) and takes the longest to sell (45 days). Business Bay (6.2%) is the best choice for a more central location.
